CALL FOR
VEHICLE

CONNECT
VEHICLE FLEET

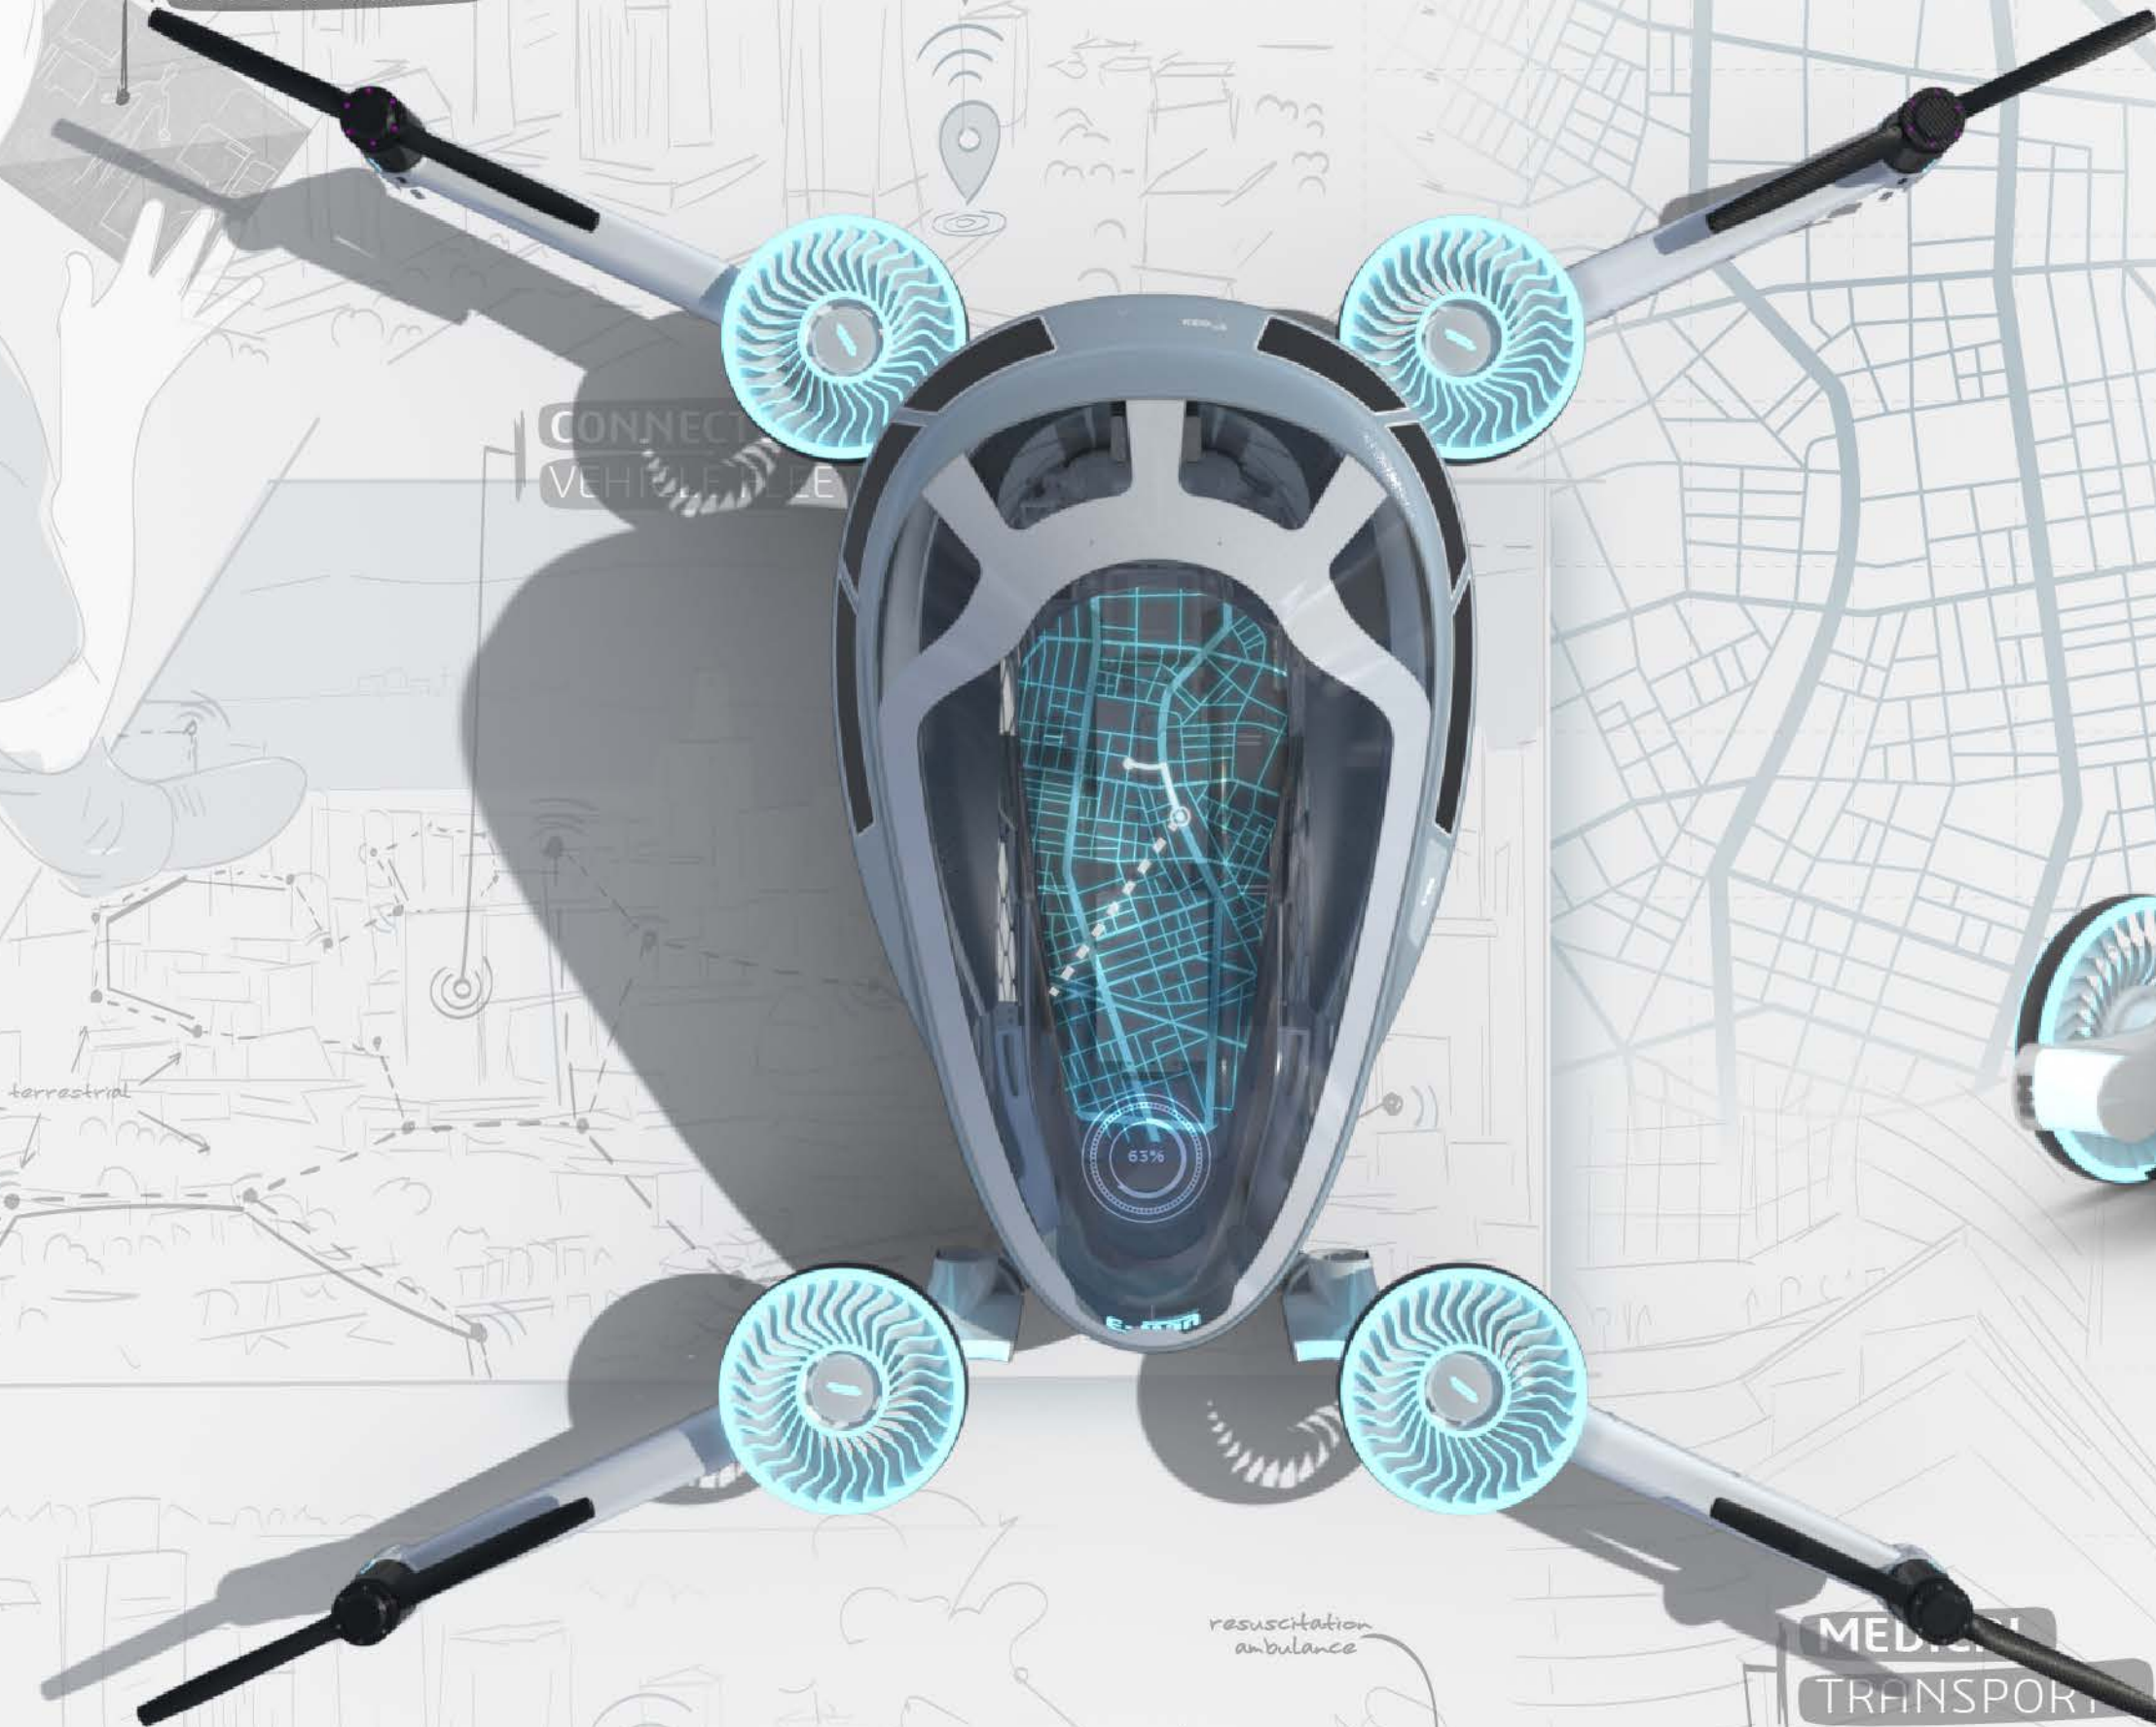

Connected platform

Vehicle fleet connected to a platform for **monitoring and optimizing the medical journey**. In order to avoid the loss of information, the information related to the patient's medical file, as well as the conditions of the intervention are directly transmitted to the platform capable of finding and notifying the most suitable establishment to receive the patient and to send a vehicle to the location entered by the doctor or fireman.

FAST ARRIVAL
AND INFORMATION
SYNCHRONIZATION

medical information
